

Machine Readable Disclosure File

The information in this file is provided as required by The Centers for Medicare & Medicaid Services' Price Transparency Final Rule. This file contains our gross standard charges, cash-discounted rate, and negotiated rates per payor. We charge the same for all patients, but a patient's responsibility may vary depending on rates negotiated with health plans and your individual coverage. If you are a potential patient please call our MCMC's estimate team at 541-296-7500 for a clearer estimate for an upcoming procedure. Patients without insurance or do not have enough insurance may qualify for discounts.

****The information contained in this file is intended for informational purposes only and does not represent any obligation or agreement.**

Standard Charges Tab	Description
Negotiated Inpatient/Outpatient Charge	These columns represent the negotiated charges for inpatient/outpatient items and services
Minimum Negotiated Charge	This column represents the lowest reimbursement rate that a hospital has negotiated with all third-party payers, and/or cash-discount for an item or service.
Maximum Negotiated Charge	This column represents the highest reimbursement rate that a hospital has negotiated with all third-party payers for an item or service.
Blank spaces in Charge columns	A blank cell represents an item or service that has not been performed for that payer or does not have a negotiated rate available.
Custom Code	A custom code may appear in the code column instead of a CPT or HCPCS code. These are internal codes used when a CPT or HCPCS code does not exist for that item or service. These scenarios can include: supplies, pharmacy items, Room/Board charges and time-based charges.
Cash-Discounted Standard Charges Tab	Description
Cash Discount Inpatient/Outpatient	This section presents information regarding discounted cash pricing for those patients who pay without insurance coverage.

Notes: DRG price may vary based on complexity of treatment. Drug prices may vary based on dosage, supplier's availability, and cost to hospital. Supply prices may vary based on manufacturer's cost to hospital.
